Download Everything Search today to experience lightning-fast file searching, an intuitive interface, and powerful filtering options that make managing your files easier than ever.

What is Everything Search?

Everything Search is a free desktop search utility developed for Windows that creates a comprehensive index of all files and folders stored on your NTFS drives. Once the initial indexing process is complete, searches are performed in real time, displaying matching results as you type.

Unlike Windows Search, which can be slow and resource-intensive, Everything Search focuses on filenames and folder names, making it exceptionally fast while using minimal system resources.

Whether you're a student, office professional, developer, designer, or home user, Everything Search helps you locate files in seconds instead of minutes.

Why Choose Everything Search?

Searching through thousands of folders manually can waste valuable time. Everything Search simplifies this process by providing instant results with virtually no delay. Its lightweight design ensures smooth performance even on older computers, making it one of the most popular file search applications for Windows users.

With advanced search filters, customizable settings, and real-time indexing, Everything Search is the perfect solution for organizing and locating files efficiently.

Key Features

- Instant file and folder search
 - Extremely fast indexing
 - Lightweight and efficient
 - Minimal CPU and RAM usage
 - Real-time database updates
 - Advanced search filters
 - Wildcard search support
 - Boolean search operators
 - Regular expression (Regex) support
 - Search by file extension
 - Search by file size
 - Search by modified date
 - Search removable drives
 - Network drive support
 - Bookmark favorite searches
 - Portable version available
 - Keyboard shortcut support
 - Clean and user-friendly interface
 - Fast startup time
 - Free for personal and commercial use
-

Lightning-Fast Performance

Everything Search is designed for speed. After the initial index is created, every search query returns results almost instantly. Even computers containing millions of files can display matching results in less than a second.

This exceptional performance makes Everything Search one of the fastest desktop search applications available for Windows.

Powerful Search Capabilities

Everything Search offers much more than simple filename searches. Users can perform advanced searches using multiple filters, including file size, creation date, modification date, extensions, and folder locations.

Advanced users can also utilize Regular Expressions (Regex) and Boolean operators to perform highly specific searches, making Everything Search an excellent tool for developers, IT professionals, and system administrators.

User-Friendly Interface

The software features a clean and intuitive interface that allows users of all experience levels to search efficiently. Simply launch the application, begin typing, and matching files appear instantly.

Double-click any search result to open it, or right-click for additional options such as opening the containing folder, copying the file path, renaming files, or viewing file properties.

System Requirements

Operating System

- Windows 11
- Windows 10
- Windows 8.1
- Windows 8
- Windows 7

Processor

1 GHz Intel or AMD processor

Memory

512 MB RAM or higher

Storage

Less than 10 MB of available disk space
